DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-8 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Schmeing et al US 5,166,259 or Diehl et al US 2002/0028858.

4. Each of the cited patent documents show acid functionalized latex polymers, see Diehl at [0008] and Schmeing et al. at column 3. Surfactants are disclosed in Schmeing at column 8 line 23 and Deihl at [0020]. The glass transition temperature limitation is presumed to be inherently met given that the art shows the same monomeric constituents polymerized in the same manner. It is reasonable to presume that the art possesses properties that either anticipate and/or render obvious those claimed. Rejections under 35 USC 102/103 are appropriate when the art teaches all the claimed compositional components and is silent to a claimed property.

Response to Arguments

5. Applicant's have amended the claims so as to require the acid monomer to be 6-11% and 35-45% styrene.

1. Applicant's amended claims and arguments filed 2/9/09 have been fully considered but they are not persuasive.

6. At the outset, "about 5%" is considered to anticipate "about 6%".

7. The claimed amount of styrene is within the disclosed amount of styrene in the cited art.

8. One of ordinary skill in the art understands the monomers and the manipulation of Tg by using hard and soft monomers in forming copolymers. There are no unexpected results based upon the claimed Tg when compared to the closest prior art. Further, it is prima facie obvious to optimize relative proportions by obvious experimentation.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

9. This claim is not further limiting. The claimed minimum amount of acid monomer is not within the scope of the claim from which it depends.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
